

Joel Martin S

Engineering Graduate | Full Stack Developer | Backend & AI/ML Enthusiast
sjoelmartin.1703@gmail.com | +91 9487883716 | Kovilpatti, Tamil Nadu, India

PROFESSIONAL SUMMARY

Software Engineer with experience in full-stack web development, backend API design, authentication systems, and enterprise software development. Skilled in Java, JavaScript, Python, Spring Framework, Spring Security, SQL, and modern frontend technologies including HTML, CSS, Tailwind CSS and React. Experienced in secure API architecture, exception handling, query optimization, and scalable backend workflows.

Currently exploring Artificial Intelligence and Machine Learning using Python, NumPy, Pandas, Scikit-learn, Computer Vision, Statistics, and Linear Algebra. Strong foundation in Data Structures and Algorithms with active problem-solving practice. Demonstrated leadership and teamwork as captain of the college football team for 2 years, contributing to 10 tournament victories.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, SQL

Frontend Development: HTML5, CSS3, Tailwind CSS, JavaScript, React JS, Responsive UI Design

Backend Development: Spring Framework, Spring Boot, REST APIs, Authentication & Authorization, API Design

Security & Authentication: Spring Security, JWT Authentication, Tokenization, Role-Based Access Control (RBAC)

Database Technologies: MySQL

AI / Machine Learning: Python, NumPy, Pandas, Scikit-learn, Machine Learning Fundamentals, Statistics, Linear Algebra

Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Developer Tools: VS Code, Eclipse, MySQL Workbench, GitHub

EXPERIENCE

Associate Software Engineer

July 2025 – September 2025

Odessa Solutions Private Limited

Bangalore, Karnataka

- Worked on the Core Project framework for developing lessor portal for customers who perform lease, gained expertise on UX and SQL query optimization, backend exception handling, OOP principles in C#.

PROJECTS

JWT Authentication & Secure Session Management System

Stacks: Spring Boot, Spring Security, JWT, SQL

- Implemented JWT authentication, refresh token workflows, token rotation, and role-based access control using Spring Security, also designed centralized exception handling and secure API authorization mechanisms.

CognifyUX : Cognitive Load Estimation Framework

Stacks: React, ML, UX Analytics, Statistics

- Developed a behaviour-driven UX analytics framework to estimate user cognitive load using interaction metrics such as click hesitation, navigation depth, task completion time, and error recovery, these metrics are scaled into cognitive friction score and visual analytics to enable data-driven usability evaluation and interface optimization.

RouteWise : AI - Powered Fare Finder Across All Travel Modes

Stacks: REST APIs, AI APIs, Controller Mapping

- Developed a full-stack travel fare comparison web application integrating multiple travel APIs and AI powered APIs for optimal route and transportation suggestions, along with API-driven data handling and asynchronous request management for real-time travel insights

PostuRescue : Position & Orientation of Computer User using ML

Stacks: OpenCV, ML, CV, Haar Cascade Classifier

- Developed a machine learning-based posture monitoring system to ensure safe user distance and orientation while using computer devices, which implemented Computer Vision techniques and Haar Cascade Classifier models for facial and body point detection

EDUCATION

Master of Technology in Computer Science Engineering (Integrated 5 Years) : CGPA: 8.2/10

Nov 2021 – March 2026

Sri Krishna College of Engineering and Technology

Coimbatore, Tamil Nadu

Related Coursework: Data Structures & Algorithms, Objects & Design, Computer organization & Programming, Big Data Analytics & Machine Learning, Artificial Intelligence, Statistics & Applications

PROFESSIONAL STRENGTHS

- Effective communication and collaboration skills developed through academic projects and team environments
- Leadership experience through captaining the college football team and articulated mentorship
- Quick learner with continuous exploration in backend engineering, AI/ML, and modern SDE practices
- Ability to work in fast-paced environments with focus on adaptability
