

Joel Martin S

Engineering Graduate | Full Stack Developer | Backend & AI/ML Enthusiast

sjoelmartin.1703@gmail.com | +91 9487883716 | [GitHub SJoelMartin](#) | [LeetCode Joel Martin S](#) | Kovilpatti, Tamil Nadu, India

PROFESSIONAL SUMMARY

Full Stack Developer with experience building secure, scalable web applications and REST APIs using Java, Spring Boot, React, and MySQL. Skilled in authentication systems, backend architecture, and cloud deployment. Hands-on experience in end-to-end application development, production deployment, and AI integration. Strong foundation in Data Structures, OOP, DBMS, and operating systems with a growing interest in Machine Learning and Computer Vision.

TECHNICAL SKILLS

Programming Languages: C, Java, JavaScript, Python, SQL

Frontend Development: HTML5, CSS3, Tailwind CSS, JavaScript, React JS, Responsive UI Design

Backend Development: Spring Boot, REST APIs, Spring Security, JWT Authentication, Role-Based Access Control

Database Technologies: MySQL

Cloud & Deployment: Vercel (FE), Northflank (BE), Railway (DB), CI/CD Basics

AI / ML: Python, NumPy, Pandas, Scikit-learn, Statistics, Linear Algebra

Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Developer Tools: VS Code, Eclipse, MySQL Workbench, GitHub, Postman

EXPERIENCE

Associate Software Engineer

July 2025 – September 2025

Odessa Solutions Private Limited

Bangalore, Karnataka

- Worked on enterprise leasing solutions and contributed to the customer lessor portal framework.
- Optimized SQL queries and implemented robust exception handling mechanisms to improve backend reliability.
- Applied OOP principles in C# and gained exposure to UX workflows and enterprise software architecture.

PROJECTS

JWT Authentication & Secure Session Management System

Stacks: Spring Boot, Spring Security, JWT, SQL

- Implemented JWT authentication, refresh token workflows, token rotation, and role-based access control using Spring Security
- Designed centralized exception handling and secure API authorization mechanisms.

AI Powered Portfolio Website

Stacks: React JS, Tailwind CSS, Gemini API

- Built an end-to-end portfolio platform featuring an AI-powered recruiter assistant integrating Gemini API, enabling natural language interaction and automated candidate information retrieval.
- Deployed and maintained production-ready services using Vercel, Northflank and Railway.

CognifyUX : Cognitive Load Estimation Framework

Stacks: React, ML, UX Analytics, Statistics

- Developed a behaviour-driven UX analytics framework to estimate user cognitive load using interaction metrics.
- Designed a scoring model based on click hesitation, navigation depth, task completion time, and error recovery.

PostuRescue : Position & Orientation of Computer User using ML

Stacks: Python, OpenCV, Machine Learning

- Built a computer vision-based posture monitoring system to detect user position and orientation.
- Utilized OpenCV and Haar Cascade classifiers for facial and body point detection.
- Improved awareness of ergonomic posture and safe device usage.

EDUCATION

Integrated Master of Technology in Computer Science and Engineering : CGPA: 8.2/10

Nov 2021 – March 2026

Sri Krishna College of Engineering and Technology

Coimbatore, Tamil Nadu

Related Coursework: Data Structures & Algorithms, Objects & Design, Computer organization & Programming, Big Data Analytics & Machine Learning, Artificial Intelligence, Statistics & Applications.

ACHIEVEMENTS

- Solved over 950 problems in LeetCode securing 500 Days Badge..
- Led the project team, in completing 2 web applications, from paper works to prototyping, adhering to SDGs.
- Honoured as the Sports President of college in 2025-26 Academic Year.
- Captain of the college football team for 2 years and led the team to 10 tournament victories.
- Won Best Sportsman Award in Dharshan 2024-25 Annual Awards.
